

## LSL Life - Corlena

Corlena's Mother: When she was born and finding out that she had the diagnosis of hearing loss, it was kind of surreal. At first I was thinking like, "Yeah, the tests, they don't know what they're talking about in the hospital." From the initial diagnosis, the resources that came about, being introduced to them was just like the door, the gate to all this gold for Corlena.

Corlena's Dad: To see her just respond to Mommy, it was like, "Whoa, that's you, Grandmama. Whoa, that's you, Mommy." It was an overwhelming feeling of joy.
